

**CASE
STUDY**

**Office and Canteen Unitary manufacture & installation
at the Innovation Centre (Salford)**

Client: Mark One Interiors

Site: Salford Innovation Centre

Project Manager: Carl Brattan

Project Brief:

We were approached by a quantity surveyor that we have worked with on previous projects. We quoted for the work and won it. We were then issued with drawings and visuals, which we converted into working drawings, to allow production. We encountered specification changes during production and reduced timescales but with good communication between the designer and our drawing office we still managed to deliver on time and on budget.

Project Solution:

Once manufactured the unitary was delivered to site and installed by our experienced fitting team, in accordance with the client's schedule.

Project Date:

April 2011

Suppliers:

Lawcris Panel Products

Dulux Paints

White Rose Services (U.K.) Ltd
