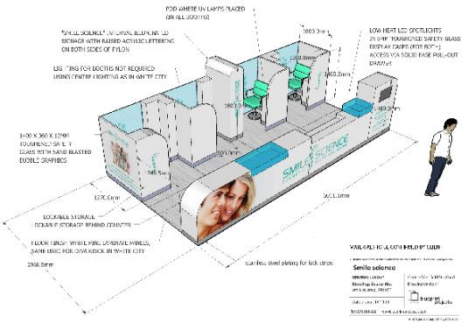
CASE STUDY

Retail Kiosk Manufacture & Installation

at Westfield Stratford City



Client: Smile Science

Location: Westfield Stratford City

Project Manager: Richard Marriott

Project Brief:

We were approached by the client directly after viewing our website. We quoted for the works, including manufacture, graphics, installation and won the works. We were issued with some drawings and a visual, which we converted into working drawings, to allow production. We made some specification changes during production and reduced timescales but with good communication between the designers, the client and our drawing office and we still managed to deliver the project within 10-working days from date of order and we delivered it on time and on budget.

Project Solution:

We manufactured the unitary using a change in specification, all graphics, electrics, glazing and flooring. We delivered to site and it was installed by our experienced fitting team, in accordance with the client and the management team at the shopping centre during an out of hours shift.

Project Date:

November 2011

Suppliers:

Tynan Electrical Limited

Saphire Signs
